

2026 Spring Wheat Kickoff Meeting

AgriPro[®]

syngenta[®]

Agenda

- **Introduce New Staff**
- **Review Key Products**
- **Research Overview**
 - New info on varieties positioning, training
 - Portfolio Data Review
- **Business**
 - Foundation/registered seed orders
 - Stewardship
- **Awards**

Introduction – Renae Crothers

Education

- B.S. University of Nebraska – Lincoln
- M.S. Purdue University

Experience

- University of Arizona
 - Lab Technician
- Driscolls Strawberry Associates
 - Research Associate
- KWS/Betaseed
 - Trial Manager – Seed productions for sugarbeet breeding
- AgriPro
 - Foundation Seed lead

Favorite Pastimes

- Anything outside: camping, gardening, hiking

2026 South Dakota Lineup

New for 2026

AP Dagr

Top-End Yield Potential

- Broadly adapted in the Northern Plains, with exceptional yield record in South Dakota
- SY Valda pedigree
- Very good bacterial leaf streak (BLS) tolerance

AP Iconic

Next-Gen Yield Leader

- Top-yielding AgriPro variety across North Dakota and Minnesota, three-year data
- Solid protein potential
- Very good straw strength
- Very good fusarium head blight and bacterial leaf streak tolerance

Yield

AP Elevate

Elevating Wheat Yield Potential

- Excellent combination of yield and protein potential
- Widely adapted
- Very good straw strength

SY Valda

The Yield Warrior

- Later Maturity

Yield Plus Protein

AP Gunsmoke CL²

Double-Barreled Performance

- Powerful yield and protein combination
- Handles stress and marginal soil conditions well

Protein Plus Yield

AP Revolution

Bred for South Dakota!

- Earliest heading variety in the AgriPro brand lineup
- Very good fusarium head blight and bacterial leaf streak tolerance
- High Protein with high yield potential

Yield Plus Protein

AP Murdock

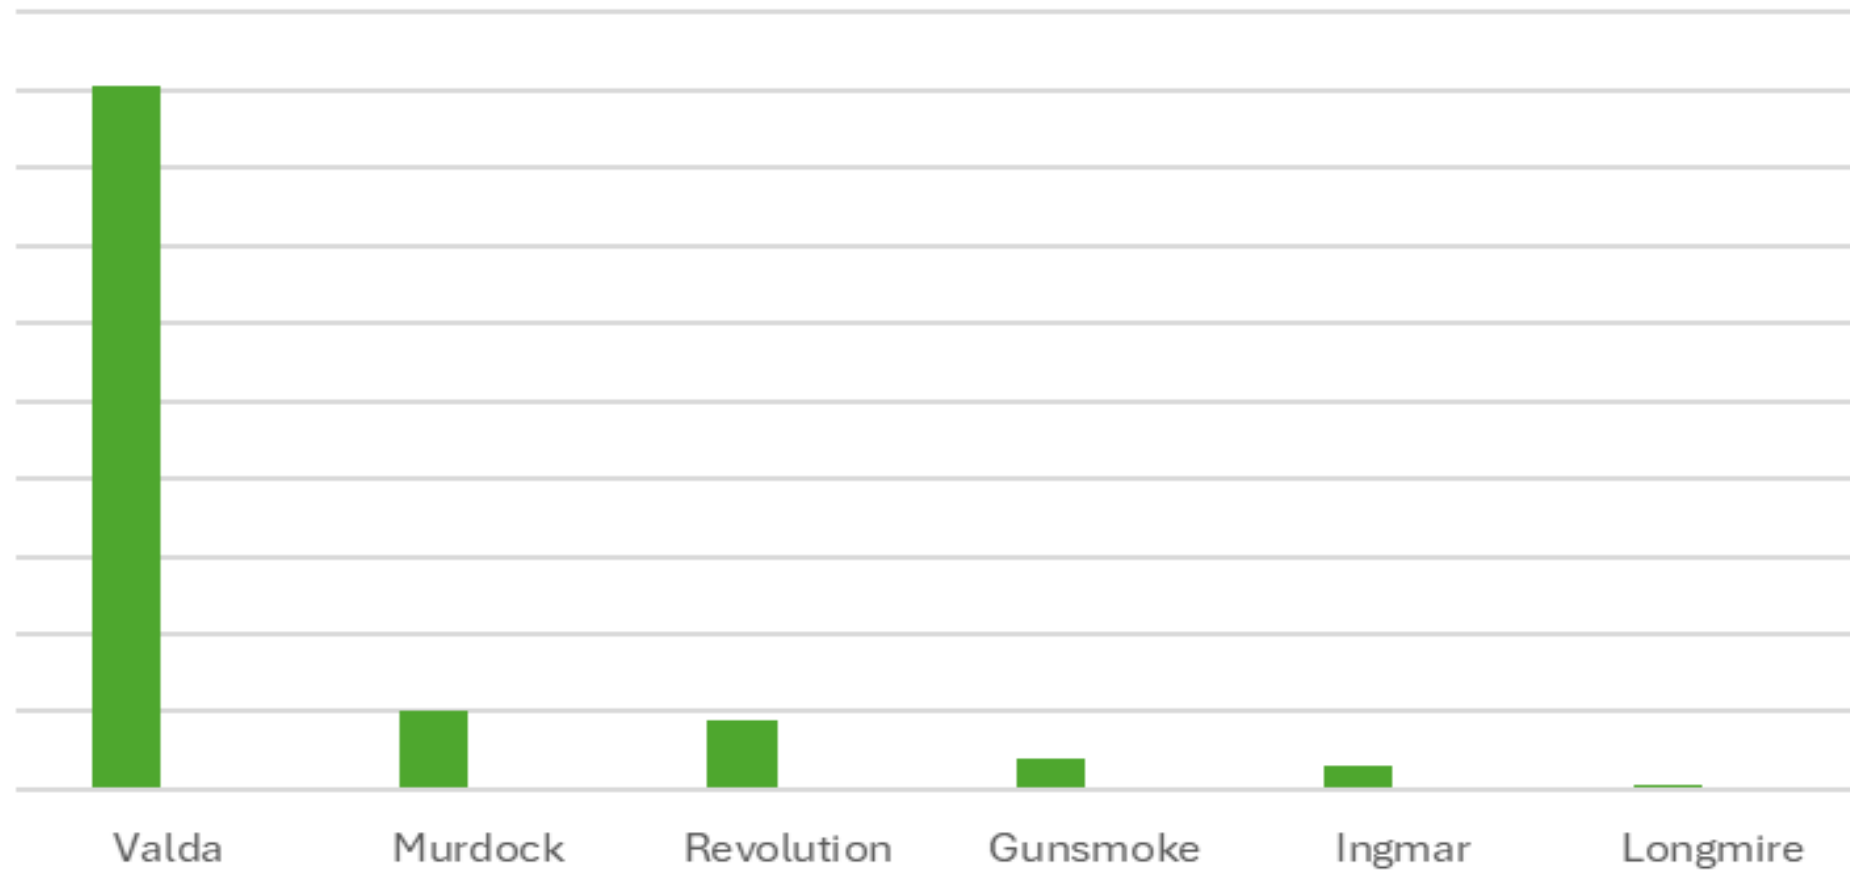

Yield Muscle and Straw Strength

- Early maturity
- Excellent harvestability

AgriPro

syngenta

2025 HRSW Certified Units Sold

New for 2025

AgriPro Hard Red Spring Wheat Varieties

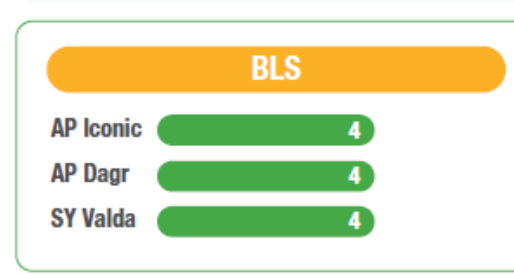

AP Iconic CSO and AP Dagr

A New Generation of Top-Tier Yield Performers

2023-2025 Syngenta Yield Trial Data bu/a			
Region	AP Iconic CSO	AP Dagr	Trial Mean
Eastern ND/MN	87.5	85.7	85.4
Western ND	83.4	79.8	80.1
South Dakota	62.2	63.1	61.0

AP Iconic CSO and AP Dagr

- » Chart-topping yield potential
- » Protein potential and agronomics similar to SY Valda
- » Broadly adapted
- » Solid disease package

Experimental 7405

AgriPro Hard Red Spring Wheat Variety

New for 2025 **AP Iconic CSO**

Top-Tier Yield Potential

2023-2025 Syngenta Trial Data		
Region	Yield bu/a	Mean bu/a
Eastern ND/MN	87.5	85.4
Western ND	83.4	80.1
South Dakota	62.2	61.0

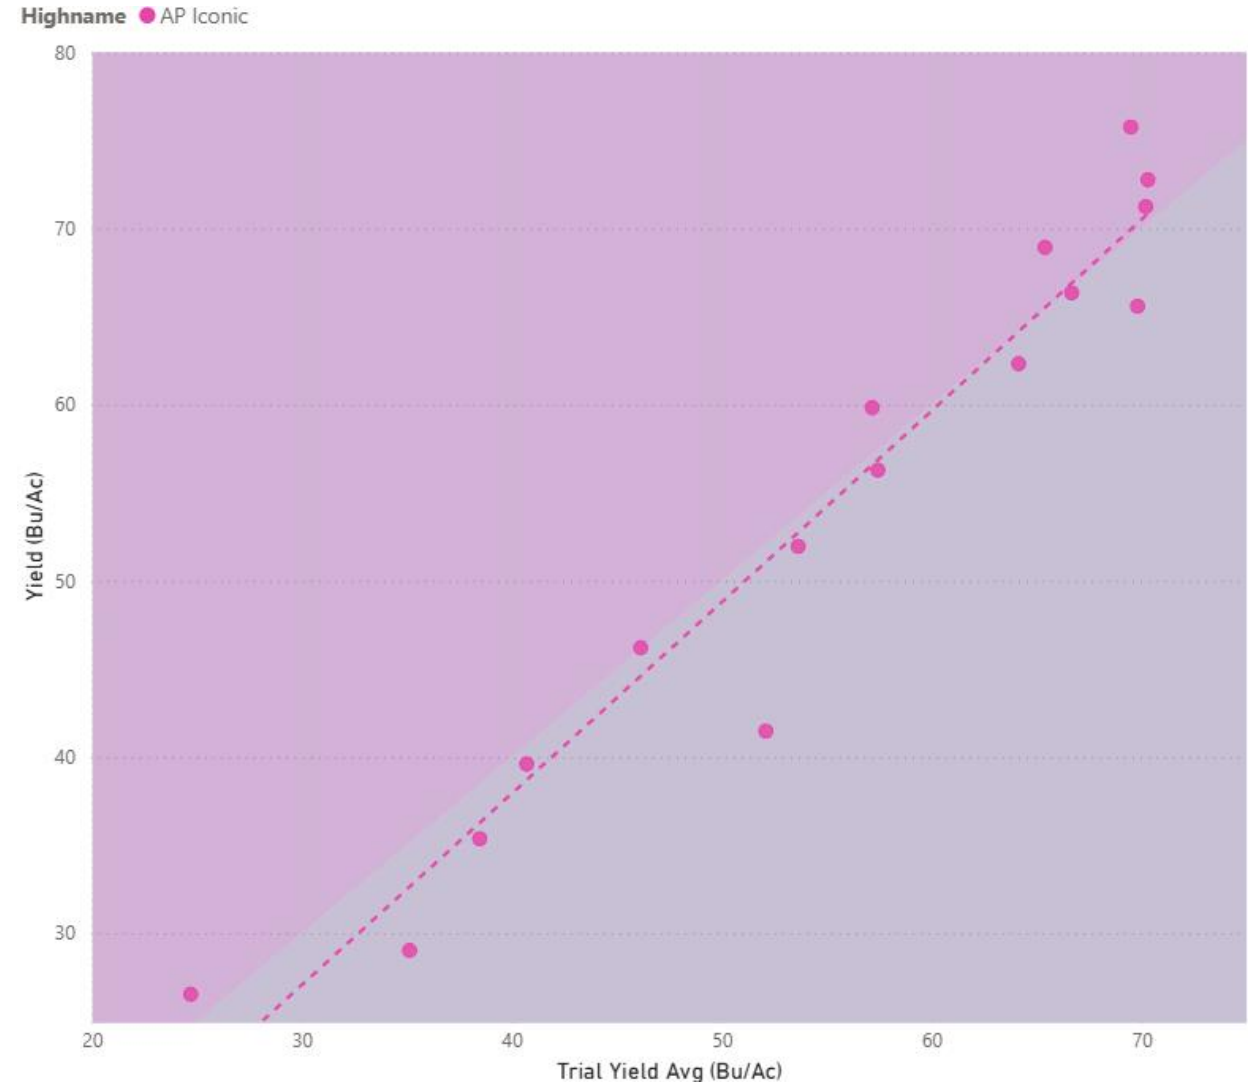

- » CSO required — no saved seed
- » Excellent yield across the region and works well in western North Dakota
- » Good straw strength

2026 Comparison Data								
Variety	Test Weight	Protein	Heading	Maturity	Height	Straw Strength	FHB	BLS
AP Iconic CSO	2	6	5	6	6	3	4	4
AP Elevate	2	5	6	6	4	3	4	4
SY Valda	2	6	5	7	5	5	4	4

East	103%	14.5	23
West	102%	14.8	13
South Dakota	109%	16.3	10

AP Murdock

Yield Muscle with Strong Straw

- Excellent yield with good protein
- Early maturity with quick dry down
- Excellent harvestability
- Very good straw strength
- Very good fusarium head blight and bacterial leaf streak tolerance

Ratings Key:

General: 1 = Excellent or Best; 9 = Poor

Protein: 1 = Highest; 9 = Lowest

Maturity: 1 = Earliest; 9 = Latest

Height: 1 = Shortest; 9 = Tallest

All ratings may vary with growing conditions

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2025 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

Aridity (Dryness) Index

- Negative = Excess Moisture
- Positive = Moisture Deficit

31 May 2025 ~7 AM till 31 Aug 2025 ~7 AM Aridity Index by Climate District

U.S. Seasonal Drought Outlook

Drought Tendency During the Valid Period

Valid for October 16, 2025 - January 31, 2026
Released October 16, 2025

Depicts large-scale trends based on subjectively derived probabilities guided by short- and long-range statistical and dynamical forecasts. Use caution for applications that can be affected by short lived events. "Ongoing" drought areas are based on the U.S. Drought Monitor areas (intensities of D1 to D4).

NOTE: The tan areas imply at least a 1-category improvement in the Drought Monitor intensity levels by the end of the period, although drought will remain. The green areas imply drought removal by the end of the period (D0 or none).

Author:
Brad Pugh
NOAA/NWS/NCEP Climate Prediction Center

-  **Drought persists**
-  **Drought remains, but improves**
-  **Drought removal likely**
-  **Drought development likely**
-  **No drought**

AgriPro Trialing

- 23 trial locations across 3 states
- ~70% yearly success rate
- Yield trial management
 - CruiserMaxx Vibrance Cereal
 - Planted at 1.5 M seeds/acre
 - Hybrids at 1.2 M seeds/acre
 - 80-100 bu yield goal fertility
 - Fungicide
 - Herbicide timing if needed
 - Heading

Statistical Terms to Understand

WB9641			85.5
WB9642			81.9
LCS Boom			74.3
Mean	85.4	83.6	82.5
LSD (5%)	3.3	4.0	4.8
CV (%)	6.7	6.9	
No. of Locs.	23	16	

Mean

- Average of values in a dataset.

Least Significant Difference (LSD)

- Used to determine means that differ significantly.
- We use a 5% level of significance.
- If the difference between yield of any two varieties is greater than LSD, we are 95% confident they are significantly different.

Coefficient of Variation (CV)

- A relative measure of the variability in a trial.
- Lower values (<15) likely acceptable (<10 is desired).
- High CV indicates large amount of variation in trial(s).

Calculating Economic Return

Variety	Yield Average bu/ac			Protein %	Test Wt. lb/bu	Economic Return ¹	
	3-yr	2-yr	2025			Gross \$/A	Rank
AgriPro HY155	92.4	91.5	90.8	14.4	60.2	488.8	1
AgriPro HY162	91.7	90.6	90.8	13.8	59.8	461.9	5
AgriPro HY162	91.0	89.3	86.1	13.6	60.3	450.0	8
AP Iconic	87.5	87.1	83.5	14.0	59.4	446.3	9
AP Elevate	85.9	86.0	81.9	14.5	60.1	458.5	6

\$ 5.12 cash price (grain at 14% protein)[†]

+ 0.xx protein premium (>14% protein; +\$0.08 per 1/5th)

- 0.xx protein discount (<14% protein; -\$0.10 per 1/5th)

\$ x.xx per bushel

$$[3\text{-yr avg. yield}] \times [\$/\text{Bu}] = \text{GROSS } \$/\text{A}$$

[†] Economic return calculated by using the three-year yield average multiplied by the average grain price (\$5.12/bu). (+) 8 cents per 1/5th premium over 14% protein, (-) 10 cents per 1/5 discount under 14% protein.

9 = Lowest

These agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics through the 2025 crop year. Specific conditions may cause variations within those characteristics. These relative protection values are based on current pest and disease populations, which have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends.

AgriPro Associates

Your local AgriPro Associate is a professional seedsman who grows, conditions, treats and sells AgriPro brand certified wheat seed. They are your best source for information and seed for every acre of your operation. A complete list of Associates can be found at AgriProWheat.com.

Performance and Consistency

With AgriPro® brand wheat varieties continuing to push for genetic diversity, it's no wonder AgriPro makes up the largest portfolio in the wheat industry and consistently ranks in the top yield groups in every region. It's time to plant top-performing wheat varieties in your field.

Hybrid Highlights

- Consistent, high yield potential throughout the Northern Plains —on average, 5 bushels per acre higher than SY Valda
- 80% seeding rate compared to normal
- Similar agronomics to SY Valda, but with an earlier finish
- Emerges quickly and canopies early to compete with weeds—vigorous plant type
- Similar agronomics to SY Valda, but with an earlier finish
- Excellent end-use quality
- Manage similar to other high-performance wheat

AgriPro Hybrid Wheat requires a Seed Stewardship Agreement. Planting of farmer-saved seed is prohibited.

Call your AgriPro Associate for complete yield and agronomic data.

A list of AgriPro Associates is available at [AgriProWheat.com](https://agriprowheat.com).

Wheat Stewardship Agreement

This Wheat Grower Agreement ("Agreement") is entered into between you ("You" or "Grower") and Syngenta Seeds, LLC, a Delaware limited liability company with an office at 2001 Butterfield Road, Suite 1600 Downers Grove, IL 60515 ("Syngenta"). By completing the information below and signing and returning this Agreement, You receive from Syngenta the right to purchase and plant a Syngenta hybrid wheat seed product or AP Iconic variety seed from Syngenta or distributed by a third party Syngenta-licensee (the "Seed") solely to produce a single commercial grain crop in the United States, all in accordance with the terms and conditions of this Agreement. This Agreement, together with the terms on the Seed label, constitute the entire agreement between You and Syngenta regarding Your use of the Seed and all prior negotiations and understandings between You and Syngenta with respect to the purchase and use of such Seed are hereby superseded. Any prior grower agreements between You and Syngenta relating to the Seed identified above are hereby superseded. This Agreement, as to the rights to plant the Seed will terminate after harvest, however, all obligations and restrictions pertaining to the progeny (i.e., grain) produced from the Seed shall continue on in full force and effect.

GROWER RESPONSIBILITIES

Grower agrees to:

- Use Seed solely for producing a single commercial crop in the crop year the Seed was purchased (one single time use) and not plant any unplanted quantities of Seed in any subsequent planting season without Syngenta's prior written permission;
- Not supply, transfer, license or sublicense any Seed to any other person or entity for planting or any other purpose;
- Not save any grain produced from Seed for planting by Grower or any other person or entity;
- Communicate all applicable requirements and obligations set out herein to any of its employees and agents with respect to handling of or work involving Seed and/or grain produced from Seed, and monitor such employees' and agents' compliance with Grower's responsibilities under this Agreement.

TERM AND TERMINATION

- Either party may terminate this Agreement at any time for any reason by sending written notice of termination to the other party at the address for such party specified in this Agreement. In the case of termination of this Agreement by Grower, such notice of termination must include Grower's full name and address. Further, Syngenta may terminate this Agreement for failure of Grower to fully comply with the Grower Responsibilities described above.

- If Grower violates the terms of this Agreement, in addition to other remedies available to Syngenta, Grower may forfeit any right to obtain a license to the Seed or other seed from Syngenta in the future.
- Upon termination of this Agreement, Grower will no longer have a right to purchase or use Seed (including Seed already purchased); Grower's obligations and Syngenta's rights that arose under this Agreement prior to termination will continue in effect.

GENERAL PROVISIONS

- Grower's rights shall not be transferred to any other person or entity, fully or partially, without the prior written consent of Syngenta.
- The Seed is protected by Syngenta's intellectual property rights of different nature including, but not limited to, patented and non-patented technologies, breeder's rights, trade secrets, know how, and data, as well as continuous improvements, among others. The purchase of Seed does not grant the Grower any license under such intellectual property rights, except to produce a single commercial crop in the United States.
- If any provision(s) of this Agreement is determined to be void or unenforceable, the remaining provisions shall remain in full force and effect.
- Grower consents to Syngenta and its representatives: (i) allowing Syngenta representatives to access/enter Grower's land where the Seed has been planted in prior years or are growing, for purposes of examining the land, examining Grower's crop, taking samples thereof and testing such samples; (ii) reviewing the Farm Service Agency crop reporting information, including Report of Acreage Form (FSA-578) and corresponding aerial photographs; and (iii) obtaining copies of invoices of Grower seed transactions from Grower's seed dealer.
- Grower agrees that Syngenta shall be entitled to recover any costs or expenses, including reasonable attorney's fees, incurred in enforcing its rights under this Agreement.
- The failure of Syngenta to exercise one or more of its or their rights under this Agreement on one or more occasions shall not be deemed a waiver on the part of Syngenta to exercise such right(s) on one or more subsequent occasions.
- Grower agrees that, should any GROWER INFORMATION provided change, Grower will promptly provide Syngenta with Grower's updated information at the Syngenta address provided above.

Other parties, however, all obligations and restrictions pertaining to the property (i.e., grants produced from the Seed shall continue on in full force and effect.

GROWER RESPONSIBILITIES

Grower agrees to:

- Use Seed solely for producing a single commercial crop in the crop year the Seed was purchased (one single time use) and not plant any unplanted quantities of Seed in any subsequent planting season without Byngetta's prior written permission.
- Not supply, loan, barter, or otherwise use any Seed to any other person or entity for planting or any other purpose.
- Not save any grain produced from Seed for planting by Grower or any other person or entity.
- Communicate all applicable requirements and obligations set forth herein to any of the employees and agents with respect to handling of or mark resulting Seed and/or grain produced from Seed, and monitor such employees and agents' compliance with Grower's responsibilities under this Agreement.

TERM AND TERMINATION

- Either party may terminate this Agreement at any time for any reason by sending written notice of termination to the other party at the address for such party furnished in this Agreement. In the case of termination of this Agreement by Grower, such notice of termination must include Grower's full name and address. Further, Byngetta may terminate this Agreement for failure of Grower to fully comply with the Grower Responsibilities described above.

Clearfield Variety Requirements

- All CL varieties are a CSO
 - Seed sold to be reported on Agcelerate.com (similar to other CSOs)
- \$1.70/unit certified royalty
- Registered seed required to be sprayed with Beyond herbicide
 - Benefit = clean seed
 - Certified fields do not need to be sprayed with Beyond
- Must do Clearfield confirm test w/ State Seed Dept.
 - (easy, send in sample)
- Can/should add MSO
 - (Beyond label refers to “CL Plus” which is the same “CL²”)

2026 Marketing Plan

- **Concentrate on New Products**

- Direct Mail
 - Iconic, Dagr, Elevate, & Hybrids
 - Mailing Seed Guides out
- Digital search ads
- Google ads

- **Have done less**

- Print Ads
- Radio
- Co-op with Associates

- **Blanket Marketing**

- Helps support awareness of AgriPro varieties and their performance to your customers
- Helps support the AgriPro Associate sales effort
- Not a replacement for sales efforts with your customer base
 - **It supports it!**

Marketing Opportunity

- **We are updating our address list for mailers**
 - Our lists are getting old
- Goal:
 - Send blanket mailers about our AgriPro varieties to the right customers
- **Send us your customer's, crop consultant's, key influencer's address list in excel**
 - I will follow-up with email
 - Completely optional
- All addresses given to us will be handled with the utmost confidentiality and used solely to enhance our marketing efforts.
 - Non-disclosure Agreement (NDA) available if needed
